Summary:

I.T Professional with 3.75 years of experience in **Python**, **Django**, DRF, ServerLess Framework, **AWS**(Lambda, API-Gateway, S3, EC2, IAM, DynamoDB, Textract, Rekognition). Javascript, Typescript,MySQL, etc.

Recently learned hands-on : Ansible, Prometheus, Grafana, Telegraf, Nagios.

Also, In have good understanding of Git, Docker, Linux, bash, Pandas, Jupyter-Lab etc.

I have 4 years experience in technical teaching.

Strength:

* Always interested to learn new technology and domain quickly,
* Team player, Strong interpersonal skills, troubleshooting, debugging and analytical skills.
* Ability to understand technology from architecture point of view.
* Reputation for taking complete ownership of all assignments and successfully accomplishing them with best practices.

Technical Skill:

* **Python3**, Django, Rest API, MySQL, AWS(Lambda, cloud-formation, DynamoDB, Textract, Recognition), Server Less Framework, JavaScript, PHP, HTML, Bash, Ansible, Prometheus, Grafana, Telegraf, Linux, Basic knoledge of Angular and React.

* Undergoing learning in AWS-Glue, Athena

Process: Agile

Domain: Web Development, Back-end Development, Full Stack Development, AWS Cloud management.

Applications: Rest API Building, Online Tutorial Platform development and maintenance, AWS cloud console handling, Proctoring Application (Architect & Develop)

Project Details / Roles and responsibilities in my previous companies:

1. I have developed and maintained an existing in-house **Back-End REST API** based on Python-**Django Rest Framework** Application. There I have worked on functionalities like 1.HRMS, 2. Attendance Management System, 3.Logistics Management etc.

2. Generate **MySQL** reports using MySQL work-bench, **Dockerize** existing **Python** application.

3. Worked on 'Online Tutorial Platform' where I had developed functionalities like 1. Resource Management, 2. Online Assignment Management, 3. Document Management. etc. Technologies used are PHP-Symfony, ORM, JavaScript, J-Query, MySQL(AWS RDS), EC2, S3, AWS-Textract, **Python3**.

4. I have architect and developed an online web based **Proctoring Application** for that Online Tutorial Platform to monitor student's activity in an online Examination. Technology used are (Front-End) **React**, Firebase etc. (Back-End) AWS services/infrastructure like 1.**Rekognition**, 2.**AWS-Lambda**, 3.Python3, 4.**S3**, 5.Cognito, 6.**DynamoDB**, 7.EC2, 8.Serverless Framework. 9. Cloud-Formation, 10. Boto3, **AWS-Cli** etc.

5. Also used to help others for debugging and understanding the architecture as an acting back-end lead.

Currently Working On:

Automation using **Ansible**, Server Monitoring using **Prometheus**, Telegraf, Node-Exporter and Nagios etc. in a service based leading company.
