* Undergoing learning in Data Science, Data Analysis, Machine Learning (Artificial Intelligence) and Python with Tensorflow, Pandas & more

Process: Agile

Domain: Web Development, Back-end Development, Full Stack Development, AWS Cloud management.

Applications: Rest API Building, Online Tutorial Platform development and maintenance, AWS cloud console handling, Proctoring Application (Architect & Develop)

Project Details / Roles and responsibilities in my previous companies:

1. I have developed and maintained an existing in-house **Back-End REST API** based on Python-**Django Rest Framework** Application. There I have worked on functionalities like 1.HRMS, 2. Attendance Management System, 3.Logistics Management etc.

2. Generate **MySQL** reports using MySQL work-bench, **Dockerize** existing **Python** application.

3. Worked on 'Online Tutorial Platform' where I had developed functionalities like 1. Resource Management, 2. Online Assignment Management, 3. Document Management. etc. Technologies used are PHP-Symfony, ORM, JavaScript, J-Query, MySQL(AWS RDS), EC2, S3, AWS-Textract, **Python3**.

4. I have architect and developed an online web based **Proctoring Application** for that Online Tutorial Platform to monitor student's activity in an online Examination. Technology used are (Front-End) **React**, Firebase etc. (Back-End) AWS services/infrastructure like 1.**Rekognition**, 2.**AWS-Lambda**, 3.Python3, 4.**S3**, 5.Cognito, 6.**DynamoDB**, 7.EC2, 8.Serverless Framework. 9. Cloud-Formation, 10. Boto3, **AWS-Cli** etc.

5. Also used to help others for debugging and understanding the architecture as an acting back-end lead.

Currently Working On:

Automation using **Ansible**, Server Monitoring using **Prometheus**, Telegraf, Node-Exporter and Nagios etc. At Infosys Limited.
